

PROGRAMS

ASSOCIATE IN SCIENCE (UNIVERSITY TRANSFER)

SCC offers two *fully transferable* degrees:

- **Associate in Arts (AA) and**
- **Associate in Science (AS).**

Contact(s): [John Bowman](#)

[Elizabeth Lackey](#) (contact for Associate in Science)

[Casey Covington](#) (contact for Associate in Arts)

Stanly Community College's transfer degrees offer an economical and efficient way to work towards a bachelor's degree. The math/science intensive Associate in Science degree is a good choice for future engineering, math, science (biology, chemistry, physics, etc.) or technical (computer science) majors.

UNC-system universities (and most private colleges and universities) will accept the completed AS degree as a package, which will waive the undergraduate general education requirements.

Courses identified as Universal General Education Transfer Component courses (UGETC) will transfer to the UNC-system universities and receive *course-for-course* credit (provided students earn a C or better in these courses). Other courses marked for transfer may receive general education or elective credit. Some SCC courses may not meet general education core requirements. Therefore, students should work closely with their advisors when registering for courses and planning their futures.

If a student has an AS degree and at least a 2.0 grade point average, he or she will be considered for transfer by the senior institution. If the student meets minimum admission requirements for the UNC System, he or she may transfer before completing the AS degree; however, completing the AS degree with at least a 2.0 grade point average will increase transferability to the student's college of choice.

University Transfer - Program Student Learning Outcomes

Upon completion of the University Transfer Program:

- PO.1 Students should be able to demonstrate effective research skills including all required elements as assessed in select courses as demonstrated by earning a minimum score of 3 out of 5 on the research skills rubric.
- PO.2 Students should be able to demonstrate global and cultural literacy as assessed in select courses as demonstrated by earning a minimum score of 3 out of 5 on the global/cultural literacy rubric.
- PO.3 Students will be able to analyze concepts of individuals and people within social and historical contexts as assessed in select courses as demonstrated by earning a minimum score of 3 out of 5 on the social/behaviorial contexts rubric.
- PO.4: Students will be able to use critical thinking skills to solve problems as assessed in select courses as demonstrated by earning a minimum score of 3 out of 5 on the critical thinking skills rubric.
- PO.5: Students will be able to apply scientific principles to the natural and physical world as assessed in select courses as demonstrated by earning a minimum score of 3 out of 5 on the scientific principles rubric.
