

PROGRAMS

SCHOOL AGE EXPANDED LEARNING AND ENRICHMENT

Contact(s): [Cyndie Osborne](#)

The School-Age Expanded Learning and Enrichment curriculum prepares individuals to work with children from elementary through middle grades in diverse, inclusive learning environments.

Throughout the School-Age Expanded Learning and Enrichment program, students will gain knowledge and understanding of child growth and development, computer technology in education, the physical and nutritional needs of school-age children, care and guidance practices, and ways to effectively communicate with parents, children, and other professionals in the field. Learning opportunities and course assignments provide students with a strong foundation to foster the cognitive/language, physical/motor, social/emotional, and creative development of school-age populations. Students will show competency in the program by integrating learned theories with practice in actual settings with school-age children under the supervision of qualified professionals.

Students who complete the School-Age Expanded Learning and Enrichment curriculum will be prepared to plan and implement developmentally appropriate programs and will have opportunities to work in a variety of school-age settings, including school-age teacher positions in child care programs, before/ afterschool programs, paraprofessional positions in public/private schools, recreational centers, and other programs that work with school-age populations.

School-Age Expanded Learning and Enrichment - A55440

First Year		
Fall		Credit Hours
ACA 122	Transfer & Career Success	1
EDU 120	Intro to School Age Care	4
